27-3-24

Annexure-I

The details of revised events are given below :

1. Last date of submission of bid documents : 12.04.2024 up to 5.00 PM
 2. Opening of Technical Bids : 15.04.2024 at 11.30 AM
 3. Technical presentation : Presentation will be carried out through VC only and all the participating bidders are requested to share their documents / methodology in the form of PPT to ORSAC vide official mail for official record and evaluation.
- VC link will be shared by ORSAC on 15.04.2024 by 10.30 AM
 - There will be two times LiDAR Survey for Pre-monsoon and Post-monsoon period /as per the period indicated by Water Resources Department.

Pre-Bid Queries for Undertaking LiDAR Survey of Minor Irrigation Tanks under OIIPCRA through ORSAC Empanelled Agencies

Name of Bidder/Company					M/s Matrix Geo Solutions Pvt. Ltd		
S.No	Pg.No	Point	Document	Queries	Suggestion / Clarification		Clarification by ORSAC
1	8	3. Coverage	As per AOI with a minimum 25 m buffer all around the project area boundary demarcated with white chuna (limestone powder) line / Reflector Board.	Will the ORSAC provide the demarcated boundary to the survey agency or the demarcation of boundary work included in the survey agency scope?			AOI is to be provided by ORSAC in form of .shp/kml format. However, demarcation of boundary work will be undertaken by the Survey Agency in the field
2	8	11. vertical Datum`	EGM 2008 or lates	How much vertical (Z) accuracy is required?			± 5 cm
3	9	15. volumetric Calculation	Volume Calculation	How much vertical (Z) accuracy is required?	To conduct the volumetric calculation we require the final vertical (Z) accuracy to calculate the volume on ground		± 5cm
4	9	15. volumetric Calculation	DSM/DEM for pre and post Monsoon volumetric change	To conduct the Lidar drone survey requires the empty tanks to capture the point cloud data however in the post monsoon survey the lidar will not be able to capture the point cloud underwater.	If the post monsoon activity required to conduct the underwater survey for volume calculation. Shall an agency could use the eco sounder for the same.		Methodology to be submitted by the Survey Agency during presentation
5	10	Annexure B	Description of work	The BOQ is empty. Is possible to share the final Quantity of the area to do conduct the lidar survey of many tanks	in reference to the corrigendum where you provide the tanks Quantity along with the area as per Hectare. However in the tender document you mentioned that the final project boundary requires a 25 meter buffer zone outside which will directly increase the final Quantity.		Survey shall be carried out with a minimum 25 m buffer all around the project area boundary . However, deliverables are to be submitted as per actual AOI and accordingly, the payment will be made to the vendor as per deliverables.
